removed.txt

Eric, thank you for the quick response.

I will be available all day tomorrow via my cell at 908.419.6685 Please send me and e-mail as to what time is best for you tomorrow. I will make sure I am waiting for your call.

Thank you, stay cool ! 

Tim

Subject: Niagara Falls Boulevard Site

Hi Tim:

I am sorry I was unable to return your call. I am actually in Niagara Falls at the site until August 26<sup>th</sup>. Probably taking Leave the week after and then right back in Niagara Falls after that.

We can talk tomorrow if you are available. I just need to pinpoint a time to be sure I am not out in the field and unable to pick up like today.

Thanks

Almost forgot to provide you with the contact info you requested for Environmental Rail Solutions / ERS. ERS is a NJ woman owned business who has IMC's and has performed transportation from Wellsbach/GGM and is a frequent transporter of rad waste to US Ecology.

Contact info below, have a safe day!

Subject: Niagara Falls Boulevard Site

Good Afternoon Tim:

I am an On-Scene Coordinator with the USEPA. I have two removal actions in Niagara County, Niagara Falls Boulevard Site and Holy Trinity Cemetery Site. You may be familiar with the name since my contractor, Weston Solutions, contacted you last year. The purpose then was to provide site specific data to you in order to estimate T&D cost. Below is a summary of that information.

*US Ecology operates the disposal site in Idaho, plus a few months ago they acquired the aforementioned subtitle C disposal site in Michigan. US Ecology has been in business for at least 40 years under various names, but the Idaho disposal site for bulk radioactive waste material has been open for about 10 years. The person I spoke with was Tim Curtin (908-419-6685). Based on the concentrations given, Tim recommended that the waste be trucked directly from Niagara Falls to their disposal site near Belleville, MI. He estimated the T&D cost to be \$200 to \$250 per CY. Assuming 13,000 CY of waste, the budgetary estimate is \$2.6 million to \$3.3 million.*

We have started the removal process at Niagara Falls Boulevard Site and soon will be staging excavated material. We are putting out our lab bids and eventually will bid out the T&D. Rick Robinson (USEPA Remedial Project Manager for the Welsbach Site) also mentioned your name as a good person to clarify some information. Any input would be very helpful. Thanks

- Should our T&D coordinator run our lab bid by your company and the other companies to ensure your analytical qualifications are met?
- Can you provide the Waste Acceptance Criteria for the following

radionuclides? Do you have a specific Waste Acceptance Criteria for TENORM (Technologically Enhanced Naturally Occurring Radioactive Materials)? Specifically, depleted Thorium.

- What is the size specification for waste received? The material that we plan to T&D is soil, rock/slag, asphalt and potentially concrete.

Regards,  
Eric
